

KENNESAW STATE
UNIVERSITY

GENERAL EDUCATION COUNCIL MEMBER RESOURCE GUIDE 2021-2022

Why Curriculum Matters

Curriculum is at the heart of what we do at Kennesaw State University, involving the design, development, and evaluation of the academic degree programs for our students. The primary responsibility for the content and quality of curriculum resides with the faculty whose various levels of review help create, evaluate, and enrich our curriculum, increasing learning opportunities for students and enhancing the mission of Kennesaw State University.

GEC Structural Overview

The purpose of the General Education Council, listed in the University Handbook Section 3.1.2, notes that the “the GEC is a faculty-driven, student-focused council. The primary goals of the GEC are to (1) develop and maintain a unified, integrated, and effective general education program; (2) ensure alignment with BoR policies, as well as KSU policies and mission; (3) identify and align the learning outcomes of core curriculum courses; (4) determine whether courses fit into the core curriculum; (5) communicate with administration, faculty, and staff regarding core curriculum and general education; and (6) serve as a resource to the KSU community. The council is advisory to the Faculty Senate and the Associate Vice President for Curriculum in the Office of the Provost and Senior Vice President for Academic Affairs.”

The General Education Council Executive meetings will occur on the 3rd Tuesday of the month from 12:30-1:45pm. The General Education Executive Council 1st Tuesday of the month from 12:30-1:30pm (unless noted in the schedule). A current schedule can be found on the Curriculum Committee’s Master Calendar on the homepage of the [Curriculum, Instruction, and Assessment website](#) on the [GEC website](#).

Membership of the General Education Council
The council is chaired by the Faculty Executive Director of General Education and Curriculum Development. Membership is limited to full-time faculty. Members may have administrative duties in their department or college at or below a director level.
<ol style="list-style-type: none">1. Voting Members: A voting executive committee membership is comprised of one representative per undergraduate-serving college. Executive committee members will be expected to ensure attendance and participation in the committee.2. Non-Voting Members: A non-voting advisory membership is comprised of one representative per department teaching general education courses. Members of the advisory group advise their college executive committee representative. Colleges are encouraged to have their own meetings between advisory members and the executive committee representative to ensure appropriate communication between the GEC and administrators, faculty, and staff in the college.3. Non-Voting Advisory Members to the Executive Committee<ol style="list-style-type: none">a. Faculty Executive Director of General Education and Curriculum Developmentb. Associate Vice Present for Curriculum or designeec. Curriculum Support Office representative(s)

- d. Student Government Associate representative
- e. Chairs' and Directors' Assembly representative
- f. Advising representative
- g. Office of the Registrar representative
- h. Assessment Office representative

Visualization of the Current Curriculum Process

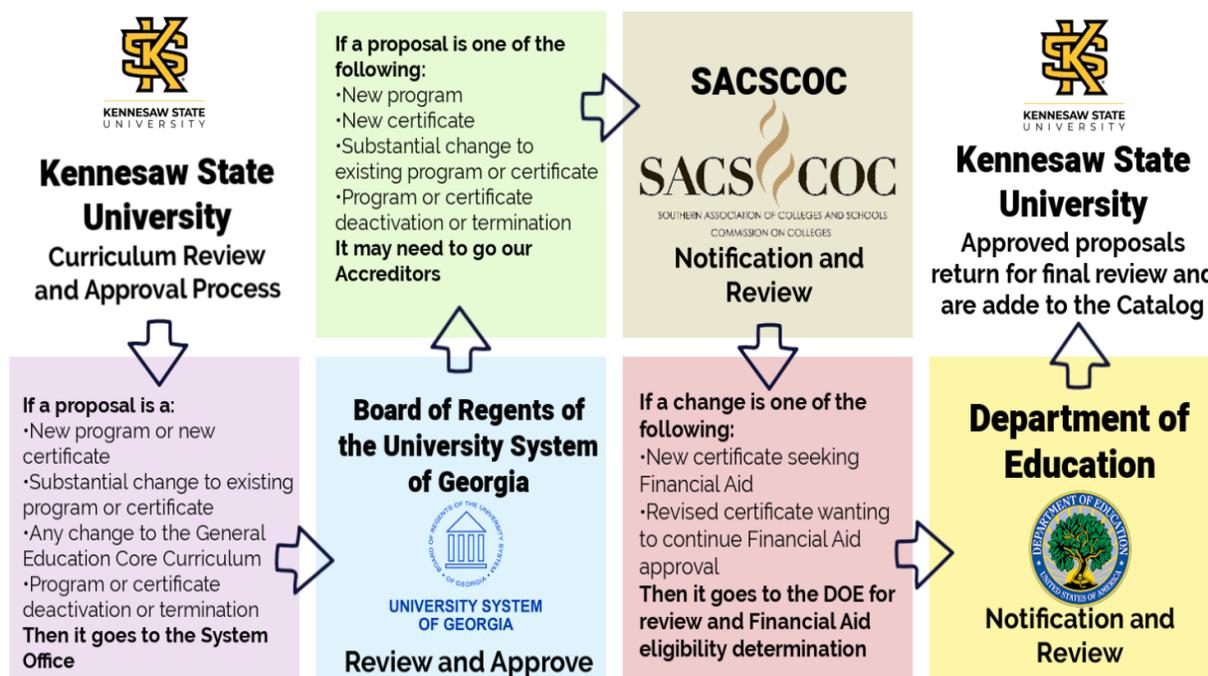

Understanding the Curriculum Process

To ensure curriculum quality and integrity there are multiple stages of review that must occur. All curriculum, new and changed, must go through Kennesaw State University's review process, and certain items must also go through additional levels of review and approval. If a proposal is a new program, a new certificate, a substantial change to an existing program or certificate, **a change to the General Education Core Curriculum**, or a

program or certificate deactivation or termination, **then it must also be reviewed and approved by the Board of Regents of the University System of Georgia.**

If a proposal is approved by the Board of Regents and is a new program, a new certificate, a substantial change to an existing program or certificate, then it may need to go to the Southern Association of College and Schools Commission of Colleges (SACSCOC), our accreditor, as a notification or for review. All deactivations must be reported to SACSCOC. Once SACSCOC confirms submitted changes, then new certificates seeking financial aid or existing certificates wishing to continue offering financial aid need Department of Education approval. Below is a visualization of this process.

Where to Find Curriculum Proposals

Kennesaw State University uses an online curriculum management system called Curriculog for the management of curriculum proposals. Curriculog is designed for faculty and administrators who are involved in adding, modifying, terminating, or deactivating curriculum proposals for courses, minors, certificates, and degree programs. [Login to Curriculog](#) using your KSU ID (without @kennesaw.edu) and KSU password.

Purpose and Function of Curriculog

The curriculum management process is entirely online, including the completion of the curriculum proposals, the curriculum meetings (if desired) and agendas, and the review and approval by electronic signature of the curriculum committees and administrators. Since Kennesaw State University also uses Acalog, the electronic catalog system, appropriate fields in the curriculum proposals will populate from Acalog, when imported.

Functions of Curriculog
Curriculog provides the correct routing for curriculum proposals
Curriculog ensures that all required fields for course and program proposals are completed
Curriculog provides a repository for curriculum changes
Curriculog allows for curriculum agendas and committee voting online

The Current Core Curriculum at Kennesaw State University

The current Core Curriculum is composed of five areas, A-E as indicated in the chart below. General Education is the foundation of skills and knowledge that prepare students for success in their majors and as well as in their personal and professional lives after graduation.

Current Core Curriculum at Kennesaw State University
Area A: Essential Skills A1- Communication (6 credit hours) A2- Quantitative Reasoning (3 to 4 credit hours)
Area B: Institutional Options B1- Contemporary Economic Issues (2 credit hours) B2- Cultural Perspectives (3 credit hours)
Area C: Humanities, Fine Arts, and Ethics C1- Literature of the World (3 credit hours) C2- Arts and Culture of the World (3 credit hours)
Area D: Science, Mathematics, & Technology D1- Applied Math (3 to 4 credit hours) D2- Science Process (7 to 8 credit hours)
Area E: Social Sciences E1- U.S. Government (3 credit hours) E2- U.S. History (3 credit hours) E3- World History (3 credit hours) E4- Social Sciences (3 credit hours)

USG Policies Governing the Core Curriculum

The University System of Georgia Board of Regents regulates the use of courses in the core curriculum in order to ensure transferability. Selected regulations are noted in the chart below and the complete version list of policies are in the Board of Regents of the University System of Georgia Academic & Student Affairs Handbook [section 2.4](#).

University System of Georgia Core Curriculum Regulations
The USG denotes required learning goals, but each institution must develop their own learning outcomes must be approved by the University System of Georgia Council on General Education.
The USG requires that every institution have a core curriculum of 42 semester hours.

University System of Georgia Core Curriculum Regulations

The USG requires that all institutions use common course prefixes, numbers, and descriptions for specified courses.

The USG requires that all courses in Areas A–E must be taught at the collegiate level and be broadly focused. These courses must clearly address the General Education learning outcomes of the institution.

Area F is also considered part of General Education. Although Area F is owned by the programs, it must follow certain University System of Georgia requirements as noted in the chart below.

Area F Requirements

Area F must total 18 hours.

Area F must be composed exclusively of 1000 and 2000 level courses.

These courses may be prerequisites for other Area F courses and/or for major courses at higher levels. Some programs have [Area F requirements set for them by the USG](#).

The USG has rules about how programs may interact with Area A-F courses. Some of the most relevant rules for programs are in the chart below and the complete list of policies are included in the University System of Georgia Academic & Student Affairs Handbook [section 2.4.2](#).

Policies Governing A-F Courses

Every institution must offer a path to completing all Area A–E requirements composed exclusively of 1000 and 2000 level courses.

No course in Area A–E may be a prerequisite for any course outside Areas A–E. No course in one area (A–E) may be a prerequisite for any course in any other area (A–E). There are USG approved exceptions for students in Nursing, Science, Technology, Math, and Engineering programs. If one course is required in order to complete an Area, that course may be a prerequisite for a course in another Area or for a course outside of Area A–E. For example, ENGL 1101 is a required course and can be a pre-requisite for ENGL 1102 or for any other course.

Physical education activity/basic health requirements may not be placed in Areas A–F.

Orientation courses may not be placed in Areas A–F.

Courses with a primary emphasis on studio, performance, field study, or internship may not be placed in Areas A–E.

Institutions may not permit the completion of any course to fulfill requirements in more than one Area of A–F. Where the same course is authorized in more than one of Area A–F, the student completing the course to meet the requirements of one area must take another course in the second area to meet the requirements of the second area. For example, a student completing MATH 1113 Precalculus in Area A2 cannot also use that course to satisfy Area D1.

This is not an exhaustive list of rules and requirements. The entire list is available in the University System of Georgia Academic & Student Affairs Handbook [section 2.4](#)

Core Curriculum Requirements for Specific Programs

Majors in Science, Engineering, and Health programs must follow specific requirements to complete the Core Curriculum Areas A-E. To see if a program is classified as a Health, Science, or Engineering program, consult the Core Curriculum Program Categorization in the Appendix of the [Curriculum Guide](#).

Program Categorization	Exemption Type
<p>Science Programs Defined as Mathematics, physics, chemistry, biology, engineering technology, architecture, computer science, geology, geography (B.S.), forestry, pharmacy, physical therapy, secondary science, or mathematics education</p>	<p>Must require pre-calculus (MATH 1113) in A2. Must require two four-hour laboratory science courses in Area D, and may not require that students take a particular science in Area D. Must require a higher math course than MATH 1113 in Area D.</p>
<p>Agricultural Science and Environmental Science Programs</p>	<p>May require pre-calculus (MATH 1113) in Area A2.</p>
<p>Engineering Programs</p>	<p>Must require a Calculus I (MATH 1190) in A2 and must require Calculus II (MATH 2202) in Area D1. Must require two four-hour laboratory science courses in Area D, and may not require that students take a particular science in Area D.</p>
<p>Health Profession Programs</p>	<p>Must fulfill the Area D science requirement with a two-semester laboratory sequence in either physics, chemistry, or biology. The only biology courses that may be used to fulfill this requirement are “Introductory Biology” (BIOL 1107/L) and “Principles of Biology” (BIOL 1108/L). The “Survey of Chemistry” sequence (CHEM 1151 and CHEM 1152) has been designed for the Area D health professions track. Health professions majors have the option of taking the “Survey of Chemistry” sequence or the sequence appropriate for science majors, but they may not fulfill their Area D requirements with chemistry courses designed for non-science majors.</p>

General Education Learning Outcomes

The General Education program has ten learning outcomes for students engage with over the course of their core curriculum. The Core Curriculum Areas A-E is where the ten General Education learning outcomes are introduced in designated courses. The outcomes can be found in the [Kennesaw State University Catalog](#).

General Education Program Outcomes
Written Communication: Students will write & communicate at a college level in various modes, media, and/or rhetorical contexts.
Reading Comprehension: Students will demonstrate an ability to comprehend, analyze, & interpret texts in various modes, genres, media, and/or contexts.
Quantitative Learning: Students will demonstrate the ability to explain information presented in mathematical forms (e.g., equations, graphs, diagrams, tables) and/or convert information into mathematical forms at a level appropriate for the complexity of problems in a college-level course.
Critical Thinking: Students will evaluate and synthesize information to support ideas and perspectives.
Literature: Students will include multicultural, social, or historical contexts in their interpretation of literary work.
Global Perspectives: Students will analyze creative works from multiple international cultures in relation to the historical, political, economic, sociocultural, aesthetic, or personal contexts in which those works emerged.
Applied Math: Students will demonstrate an ability to effectively apply symbolic representations to model and solve problems.
Natural Sciences: Students will demonstrate an understanding of college-level scientific principles, theories, and laws, and apply them to solve problems and explore natural phenomena.
U.S. Perspectives: Students will demonstrate a broad understanding of history, political systems, or culture of the U.S.
Social Sciences: Students analyze the complexity of how historical, economic, or political relationships develop, persist, or change.

KSU General Education Course Syllabus Common Language

The KSU Faculty Senate has approved the following language for inclusion in all syllabi for courses satisfying the KSU General Education requirement. Faculty teaching General Education courses are asked to copy and paste the below paragraph and insert it into their syllabi.

“Syllabus Language for General Education program courses: [Enter course prefix & number] satisfies one of Kennesaw State University’s General Education program requirements. It addresses the [insert learning outcome title] General Education learning outcome(s). The learning outcome states: [insert appropriate learning outcome].”

Who Regulates KSU's Curriculum?

There are a variety of policies and regulations that regulate curriculum at Kennesaw State University as well the University System of Georgia Board of Regents (USG). As an institution within the University System of Georgia, Kennesaw State University's undergraduate programs are required to adhere to the requirements set forth in the USG's [Academic & Student Affairs Handbook](#). Additionally, the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), our institutional accreditor, includes guidelines on curriculum. KSU can interpret and build on USG and SACSCOC rules but cannot contradict or violate them.

SACSCOC Accreditation Regarding General Education

Kennesaw State University is accredited by the Southern Association of Colleges and Schools Commission on Colleges. There are several standards that relate to the Core Curriculum.

Principles of Accreditation Related to General Education	
Standard 8.1	
8.1	The institution identifies, evaluates, and publishes goals and outcomes for student achievement appropriate to the institution's mission, the nature of the students it serves, and the kinds of programs offered. The institution uses multiple measures to document student success.
Standard 8.2	
	The institution identifies expected outcomes, assesses the extent to which it achieves these outcomes, and provides evidence of seeking improvement based on analysis of the results for student learning outcomes for collegiate-level general education competencies of its undergraduate degree programs.
Standard 9.3	
	The institution requires the successful completion of a general education component at the undergraduate level that: <ul style="list-style-type: none">a) is based on a coherent rationale.b) is a substantial component of each undergraduate degree program. For degree completion in associate programs, the component constitutes a minimum of 15 semester hours or the equivalent; for baccalaureate programs, a minimum of 30 semester hours or the equivalent.c) ensures breadth of knowledge. These credit hours include at least one course from each of the following areas: humanities/ fine arts, social/behavioral sciences, and natural science/ mathematics. These courses do not narrowly focus on those skills, techniques, and procedures specific to an occupation or profession.
