

Program Information

College:	College of Science and Mathematics
Department:	Chemistry and Biochemistry – Undergraduate
Program:	Chemistry, Minor

Program Student Learning Outcomes

Upon completion of this degree from KSU, students will be able to:

1. Recall, integrate, and/or apply the fundamental concepts in the core areas of the discipline (organic and analytical).
2. Handle chemicals and maintain a safe laboratory workspace in accordance with safety guidelines.
3. Demonstrate basic proficiency in using standard chemistry laboratory equipment appropriate to their field.
