

Program Information

College:	Southern Polytechnic College of Engineering & Engineering Technology
Department:	Electrical and Computer Engineering – Undergraduate
Program:	Renewable Energy Engineering, Minor

Program Student Learning Outcomes

Upon completion of this degree from KSU, students will be able to:

1. Identify, formulate, and solve renewable energy problems
2. Use the knowledge, skills, and modern engineering techniques and tools required for renewable energy systems.
3. Function in multidisciplinary teams
4. Communicate effectively
